Crank Lever Shears

Crank lever shears working as the crank-and-rocker principle of operation. Whilst performing the shearing operation the knives are almost perpendicular to the stock to be cut. This shears are suited to crop, to cut sections and cooling bed lengths as well as for emergency cutting.

Types of shears available

Type	KHS355	KHS630	KHS1250
Cutting force (kN)	360	660	1,250
Material speed (m/s)	0.5 - 2.5	0.16 - 1.15	0.1 - 1
		1.0 - 1.8	0.75 - 1.45
