# Double Crank Shears

Double crank shears are designed such that knives are perpendicular to the product whilst the cut is being performed. Shears of this type are used to cut medium-sized and large-sized sections. Profiled knives will be used.

Types of shears available

Type	DKS800	DKS1120	DKS1400
Cutting force (kN)	800	1.120	1,400
Material speed (m/s)	3 - 8.5	1.2 - 3	3 - 8.5
		3 - 6
