# International **SKET** - Spare Part Service

MWE Mill Solutions GmbH is an engineering company which is specialised in the field of rolling machine construction.

## Know how

MWE provide replacement parts services on an international scale for SKET rolling mills on the basis of existing documentation and drawings of all SKET long-product rolling mills supplied and their components.

## Quality

Advanced CAD systems and consistent quality management according to DIN EN ISO 9001:2008 pursued in project engineering, design, assistance with manufacture, erection and commissioning of equipment are adapted to guarantee that cutting-edge quality requirements are met to our customers' satisfaction.

MWE produces its high-class products individually and reliably, sophisticatedly and rapidly. We are predestined therefore due to our lasting experiences, high-developed quality awareness and a high innovative strength.

## Flexibility

Being a medium-sized company with a flat management hierarchy and a customer-related business organisation enables us to respond very quickly to changed requirements and wishes of our clients.

The realisation of the entire handling of SKET Walzwerkstechnik GmbH for the delivery of spare parts was taken under the responsibility of MWE.
